

A long wooden pier extends from the foreground into the ocean, leading towards a distant island. The sky is filled with white and grey clouds, and the water is a deep blue with white foam from waves crashing against the rocks at the end of the pier. The pier is made of light-colored wooden planks and has yellow railings on both sides. A single light pole stands on the pier, and a cable runs along its length.

Milliken

Anti-fatigue concept

Employees standing up all day in areas like check-out stations, service counters, assembly lines or behind bars need physical support to keep motivation and energy. The Milliken anti-fatigue mat concept is specially designed for safety, comfort and protection in areas where people stand for prolonged periods.

Manufactured from premium quality nitrile rubber, Comfort®, Comfort Plus and Ultraflow™ mats are water resistant, resilient to impact and easy to clean on site by hosing or through industrial laundry process. They also resist oil and solvents, while reducing noise at work.

These mats offer unique cushion and ergonomic properties and the patented rubber construction of Comfort® mats has been tested and approved by the American Podiatric Medical Association (APMA).

Comfort®

- Smart trade off between support and thickness
- APMA approved
- Reduces leg fatigue and noise
- Anti-static properties
- Impervious to chemicals and oil based products
- Industrially washable in a laundry or hosed down on site

UltraFlow™

The UltraFlow™ anti-fatigue mat will provide comfort to your feet, legs, back, and more. The durable surface texture and design helps to prevent slipping, while the studded pattern on the bottom permits drainage and air circulation.

Developed for performance

The UltraFlow™ mat was developed to provide premium performance in kitchens, bars, freezers and food processing areas - to name just a few.

The mat is produced using a patented nitrile rubber construction with anti-bacterial properties, which provides a unique flow through design. It is oil and solvent resistant.

Durable and safe

UltraFlow™ is easy to clean with a pressure hose and is durable enough to withstand industrial laundry systems without damage. The durable construction of the UltraFlow™ mat will provide cushion, comfort and safety.

Comfort Plus

- 18 mm thickness for greater support
- Reduces leg and backbone fatigue, as well as strains, pains and claims caused by prolonged standing position
- Anti-static & anti-microbial properties
- Non-slip backing and beveled edges make it ideal for safety at work and wheeled traffic areas
- Impervious to chemicals and oil based products
- Light weight and easy to clean

Technical Specifications

Technical specifications	Comfort®	Comfort Plus	UltraFlow™
Product construction	Compression moulded 100% nitrile rubber		
Storage	Mats should be stored flat or rolled		
Laundrying / Cleaning	Please refer to our Processing and Handling Guidelines		
Warranty	Please refer to our written guarantee		
Sizes in cm (ca.)	84x60 / 84x139 / 84x297 / 119x178	89x148 / 89x296	84x136
Total thickness in mm (ca.)	8,5	18	8
Backing type	Flat back	Flat back	Drainage structure
Total weight (+/- 5%)	3100 gms/m ²	3460 gms/m ²	4230 gms/m ²
Electrical behaviour	Antistatic and static dissipative		Antistatic
Flammability test	ISO 13501 : rated E _{fl}	ISO 13501 : rated D _{fl} - s1	ISO 13501 : rated E _{fl}

All specifications are according to ISO 9001 Quality certification and ISO 14001 Environmental certification, and are subject to change to meet the ongoing improvements and innovation of our products.
